

NEW

Delivery date April 2025

Features

- With the two quick releases included in the scope of delivery, the rear box can be attached conveniently to the bike rack in just a few seconds. Just as quickly removed again.
- The rear box can be easily handled by one person due to its light weight.
- Two transport rollers make it easier to transport the rear box over longer distances.
- Two tensioning straps included in the scope of delivery enable secure fixing of the stowed goods for transport.
- All bike racks can always be tilted down when using the rear box.
- In Germany produced quality product with a 3-year warranty.
